

◆ **FEATURES**

- Reduce energy consumption and operating costs by 80% or more
- Maintenance free operation - lasts up to 10 to 20 times longer than conventional lighting
- Super slim design makes installation fast and simple
- Advanced multi-layer lens design results in maximum lumen output and very even panel illumination (no darker or shady areas)
- No UV or IR and no RF interference
- Optional lighting controls (motion and light sensors) and emergency backup battery provide protection and conserve energy
- Environmentally friendly - fully recyclable, no mercury or other hazardous material

>50,000 Hour Life Rating
5 Year Warranty

LED Panel Light

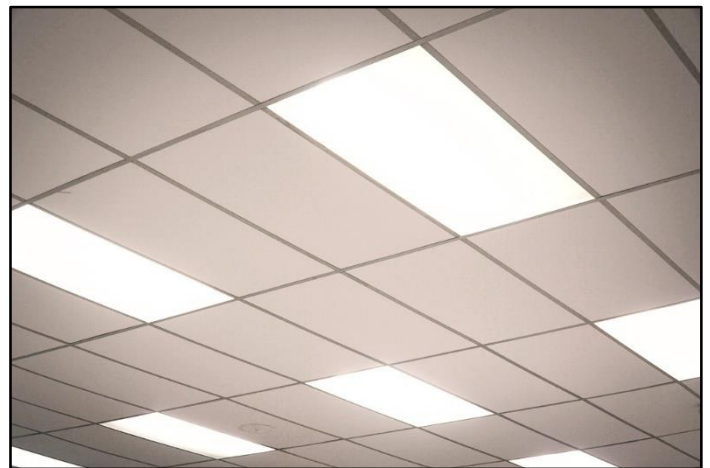

Panel light fixtures for general interior lighting applications. Ideal for commercial buildings, hotels, offices, hospitals, retail stores, plazas, etc.

Clean and elegant design provides a modern alternative to traditional fluorescent troffers.

Available in a variety of shapes and sizes for direct retrofit replacement of fluorescent fixtures.

Fully dimmable driver (0-10V dimming protocol) and a wide range of lumen output levels and light color selections, provides a solution for any application.

Uniform light distribution without hot spots, flicker or glare.
